

Licensed instruments

- X-BPM sensors and ionisation chamber beam position monitors, licensed to Danfysik
- Sagittal benders, licensed to Danfysik and licensed to Bruker Advanced Supercon GmbH
- Bimorph variable curvature mirrors, licensed to Horiba Scientific
- Mirror benders, licensed to IRELEC
- KB optical systems for focusing X-ray beam, licensed to IRELEC
- Monochromators using diamond crystals, licensed to CINEL
- High-precision miniature X-ray slits, licensed to JJ X-Ray
- Hexapod and precision jacks, licensed to Ateliers Peyronnard
- APD counter systems, licensed to Cyberstar S.A.
- Wide-beam mechanical chopper, licensed to MAATEL
- Cooled UHV compatible refractive lens, licensed to JJ X-Ray
- Flow reactor for X-ray studies, licensed to Leiden Probe Microscopy
- Permanent magnet-based insertion devices, licensed to Danfysik and licensed to Bruker Advanced Supercon GmbH
- PCI cards, licensed to SECAD
- Detector interconnection systems, licensed to Canberra Eurisys
- Components for gas-filled detectors with fast parallel readout, licensed to Bruker AXS
